THE BOARD OF MANAGEMENT'S RESPONSIBILITY

The Board of Management is responsible for the Consolidated Financial Statements which give a true and fair view of the financial position of the Company and of the results of its operation and its cash flows for the fiscal year. In preparing those Consolidated Financial Statements, The Board of Managements is required to:

- Establish and maintain of an internal control system which is determined necessary by The Board of Managements to ensure the preparation and presentation of the Consolidated Financial Statements do not contain any material misstatement caused by errors or frauds;
- Select suitable accounting policies and then apply them consistently;
- Make judgments and estimates that are reasonable and prudent;
- State whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the Consolidated Financial Statements
- Prepare the Consolidated Financial Statements on the basis of compliance with Vietnamese Accounting Standards, Vietnamese Corporate Accounting System and the statutory requirements relevant to preparation and presentation of Consolidated Financial Statements;
- Prepare the Consolidated Financial Statements on a going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Board of Management is responsible for ensuring that accounting records are kept to reflect the financial position of the Company, with reasonable accuracy at any time and to ensure that the Consolidated Financial Statements comply with the registered accounting system. It is responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Board of Management confirms that the Company has complied with the above requirements in preparing and presenting the Consolidated Financial Statements.

APPROVAL OF CONSOLIDATED FINANCIAL STATEMENTS

The Board of Management confirm that the Consolidated Financial Statements give a true and fair view of the financial position as at 31 March 2025, its operation results and cash flows in the year then ended of the Company in accordance with the Vietnamese Accounting Standards, Vietnamese Corporate Accounting System and the statutory requirements relevant to preparation and presentation of Consolidated Financial Statements.

OTHER COMMITMENTS

The Board of Management commits that the Company complies with Decree No. 155/2020/ND-CP dated December 31, 2020, guiding corporate governance applicable to public companies, and the Company has not violated the information disclosure obligations as regulated in Circular No. 96/2020/TT-BTC dated November 16, 2020, of the Ministry of Finance, guiding information disclosure on the Stock Market.

Annual accounting period commences from 1st January and ends as at 30st June

2.2. Accounting period

The attached financial statements have been prepared for the accounting period ending on 30 Junly 2025.

3. THE MAIN ACCOUNTING POLICIES

Here are the key accounting policies applied by the Company in the preparation of this financial report:

3.1. Standards and Applicable Accounting Policies

The Company applies Vietnamese Accounting Standards and supplement documents issued by the State. Financial Statements are prepared in accordance with regulations of each standard and supplement documents as well as with current Accounting Standards and Accounting System.

3.2. Accounting estimates

Manually preparing financial reports according to accounting standards, Vietnamese Accounting Standard and legal regulations related to the preparation and presentation of financial reports requires the Board of General Directors to have Computational covenants and assumptions affecting the financial statement amounts of debt, assets and presentation of liabilities and assets held at the date of the financial statements as well as the financial statements of revenues and expenses fees throughout the financial year. Although the mathematical estimates are established to the best of the Board's General Director's knowledge, actual quantity findings may differ from the estimates and assumptions made.

3.3. Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.4. Receivables

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts.

The provision for doubtful debts is made for receivables that are overdue under an economic contract, a loan agreement, a contractual commitment or a promissory note and for receivables that are not due but difficult to be recovered. Accordingly, the provisions for overdue debts shall be based on the due date stipulated in the initial sale contract, exclusive of the debt rescheduling between contracting parties and the case where the debts are not due but the debtor is in bankruptcy, in dissolution, or missing and making fleeing.

3.5. Inventories

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the weighted average method. Net realisable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling and distribution.

The evaluation of necessary provision for inventory obsolescence follows current prevailing accounting regulations which allow provisions to be made for obsolete, damaged, or sub-standard inventories and for those which have costs higher than net realisable values as at the balance sheet date.

The increase or decrease in the provision for inventory write-down is recorded in the cost of goods sold for the year.

3.6. Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working condition and location for their intended use.

The original cost of tangible fixed assets constructed by contractors includes the value of completed works handed over, other directly related costs, and registration fees, if any. The costs of self-constructed or manufactured assets are the actual construction or manufacturing cost plus installation and test running costs.

Tangible fixed assets are depreciated using the straight-line method over their following estimated useful lives. The depreciation periods are as follows:

Asset categories	Depreciation periods (years)
Buildings	15
Machine, equipment	03 - 10
Office equipment and furniture	03 - 06
Transportation equipment	05 - 10

3.7. Construction in progress

Properties in the course of construction for production, rental or administrative purposes, or for other purposes, are carried at cost. Cost includes professional fees, and for qualifying assets, borrowing costs dealt with in accordance with the Company's accounting policy. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

3.8. Financial investments

Financial investments are accounted for using the cost method; the net income earned from the companies after the investment date is recognized in the Income Statement. Other distributions (besides net income) are considered as a recovery of the investment and are recorded as a reduction in the investment's original cost.

Other short-term and long-term investments are recognized and reflected in the financial statements using the cost method.

3.9. Owner's equity

Owner's equity is stated at actually contributed capital of owners.

Undistributed profit after tax is used to record business results (profit, loss) after corporate income tax and the situation of income distribution or loss handling of the Company. In the case of payment of dividends, profits for the owners exceeding the undistributed profit after tax shall be essentially decrease of contributed capital. Undistributed profit after tax can be distributed to investors based on capital contribution rate after approval by the Board of Members and after making appropriation to funds in accordance with the Company's Charter and Vietnamese regulatory requirements.

3.10. Revenues

Rendering of services

Revenue from rendering of services shall be recognised when all the following conditions have been satisfied:

- The amount of the revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The stage of the completion of the transaction at the end of the reporting period can be measured reliably; and;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Revenue from deposit interest

Revenue arising from the Company's interest shall be recognised when both (2) following conditions are satisfied:

- It is probable that the economic benefits associated with the transaction will flow to the Company; and;
- The amount of the revenue can be measured reliably.

3.11. Costs of good sold

Cost of goods sold reflects the capital value of products, goods and services sold during the period. Expenses are recognized at the time of the transaction or when they are likely to arise in the future, regardless of whether money has been spent or not. Selling price and revenue are recorded according to the matching principle.

3.12. Borrowing costs

Borrowing costs directly related to the purchase, construction, or production of assets that require a significant period to complete and be ready for use or business operation are capitalized as part of the asset's cost until the asset is placed into service or use. Any income generated from the temporary investment of borrowed funds is deducted from the cost of the related asset.

All other interest expenses are recognized in the Income Statement as they occur.

3.13. Current corporate income tax

The current tax payable is calculated based on taxable income for the period. Taxable income differents from profit before tax as reported in the income statement because taxable income does not include income or expenses that are taxable or deductible in other periods (including including carry-forward losses, if any) and in addition does not include non-taxable or non-deductible items.

The determination of the Company's corporate income tax is based on current tax regulations. However, these regulations change from time to time and the final determination of corporate income tax depends on the inspection results of the competent tax authority.

Other taxes are applied according to current tax laws in Vietnam.

3.14. Financial Instruments

Initial Recognition

Financial Assets

At the initial recognition date, financial assets are recognized at their cost, including any transaction costs directly attributable to the acquisition of those financial assets.

The financial assets of the company include cash, bank deposits, cash equivalents, short-term and long-term financial investments, and short-term and long-term receivables.

Financial Liabilities

At the initial recognition date, financial liabilities are recognized at their cost, less any transaction costs directly attributable to the issuance of the financial liabilities.

The company's financial liabilities include payables to suppliers, accrued expenses, payables to the state, and short-term and long-term borrowings.

Revaluation after Initial Recognition

Currently, there are no regulations for the revaluation of financial instruments after initial recognition.

Offsetting Financial Instruments

Financial assets and financial liabilities can be offset on the balance sheet only when the company has a legal right to offset the recognized amounts and intends to settle on a net basis or realize the asset and settle the liability simultaneously.

3.15. Foreign currency

The foreign currency transactions during the year are converted into VND with the real exchange rate at the transaction date. Real exchange rates are determined as the following principles:

- Real exchange rates when buying and selling foreign currencies: exchange rates signed in foreign currency buying and selling contracts between the Company and commercial banks;
- In case the contract does not specifically stipulate the payment rate:
+ When recording capital contribution and receiving contributed capital, applying the bid rate of the bank where the Company opens its account to receive capital from investors at the date of capital contribution;
+ When recording receivables applying the bid rate of the commercial bank stipulated by the Company for customers to make payment at the transaction time;
+ When purchasing assets or paying immediately in foreign currency, applying the bid rate of the commercial bank where the Company makes payments.
- When purchases of assets or expenses paid immediately in foreign currency: are the rate of purchase of commercial banks where the Company makes payments.

Real exchange rate when revaluating monetary items denominated in foreign currencies at the reporting date of Consolidated Financial Statements is determined on the following principles:
- For monetary items denominated in foreign currencies classified as assets, applying the bid rate of the commercial bank where the Company regularly conducts transaction;
- For foreign currency deposited in bank, applying the bid rate of the bank where the Company opens its foreign currency accounts;

- For liability accounts, applying the offer rate of the commercial bank where the Company regularly conducts transaction.

All exchange differences arising from foreign currency transactions in the year and from revaluation of remaining foreign currency monetary items at the end of the year are recorded immediately to operating results of the accounting year. The Company must not distribute its profit nor pay dividend on the exchange gains arising from the retranslation of the foreign currency balance of the accounts derived from foreign currencies at the end of the year.

3.16. Related Parties

The parties are regarded as related parties if that party has the ability to control or significantly influence the other party in making decisions about the financial policies and activities. The Company's related parties include:

- Enterprises, directly or indirectly through one or more intermediaries, having control over the Company or being under the control of the Company, or being under common control with the Company, or being under common control with the Company, including the Company's parent, subsidiaries and associates;
- Individuals, directly or indirectly, holding voting power of the Company that have a significant influence on the Company, key management personnel including directors and employees of the Company, the close family members of these individuals;
- Enterprises that the above-mentioned individuals directly or indirectly hold an important part of the voting power or have significant influence on these enterprises. In considering the relationship of related parties to serve for the preparation and presentation of Consolidated Financial Statements, the Company should consider the nature of the relationship rather than the legal form of the relationship.
